Who does Citrix use to monitor Citrix? **eG Innovations.**

With the global pandemic increasing the number of remote users almost overnight, the need for managing the end user experience has never been more critical. Many enterprises are being asked to manage an order-of-magnitude increase in the number of remote workers.

We 're being forced into the world's largest work-from-home experiment and, so far, it hasn't been easy for a lot of organizations to implement.

– Gartner, March 2020

Ensuring Fast and Seamless Digital Workspace Experience for Your WFH End Users

eG Express Cloud

- Ensure excellent performance and user experience for ALL your work-from-home employees
- Monitor business-critical WFH services without requiring any on-premises monitoring software
- Get built-in domain expertise to identify even the most complex performance issues along with prescriptive alerts to triage your problem
- Out-of-box reports provide historical analytics for rightsizing and optimization

eG Logon Simulator

- Track every step of the Citrix logon process: browser access, authentication, enumeration, HDX session establishment, and application launch to detect logon issues proactively
- Monitor the availability of published applications, such as Cerner, Epic, SAP, Outlook, Office 365, etc.
- Test if the entire work-from-home delivery infrastructure is working in concert

Need help monitoring digital workspace performance?

Even those enterprises that have been planning to gradually increase their number of remote workers may not have been prepared for a global pandemic. There are several ways eG Innovations can help:

eG Innovations Offers The Industry's Only Fully SaaS-based Free Citrix Logon Simulator for Citrix and Omnisca Horizon

eG has always offered customers a cloud-based logon simulator for Citrix or Omnisca Horizon.

FREE Logon Simulator:

- For Citrix
- For Omnisca Horizon

These Free Logon Simulators can be set up in minutes, are ad-free, and require no credit card details

“

Because we use eG Innovations as a proactive monitoring tool, we can pinpoint latency right away, before users even feel it. They go about their business day to day, without worrying about IT problems.

Peter Dinh
Citrix Systems Administrator, eBay Inc.
